HOD, CSE

About the Department of Computer Science and Engineering

In 2005, our Computer Science Department was established, marking the beginning of a journey that started with an enrollment of 60 students and has since grown to accommodate 120 students annually. Our primary goal has always been to provide exceptional education in Computer Science Engineering.

We take pride in our accreditation from the prestigious National Board of Accreditation (NBA), demonstrating our unwavering commitment to becoming a Center of Excellence. Our vision is to deliver education and consulting services that meet global standards in computer science, with the aim of nurturing globally competitive and self-disciplined computer engineers who are poised to make significant contributions worldwide.

In response to the rapid evolution of technology and the constant need for innovation, we are dedicated to producing high-quality professionals who hold key positions in the IT industry in India and beyond.

Our Computer Science and Engineering Department offers a B.Tech program that emphasizes a deep understanding of fundamental principles and expertise in emerging technologies, cybersecurity, computing devices, and computer architecture. The department features fully equipped laboratories with advanced software such as MATLAB, Oracle, Cisco Packet Tracer, and many more, along with a state-of-the-art project lab designed to meet industry standards.

Our faculty consists of highly qualified professors with Ph.D. and M.Tech. degrees from esteemed institutions like IITs and NITs, ensuring a comprehensive and enriching learning experience for our students.

The Computer Science & Engineering Department, accredited by the National Board of Accreditation (NBA), has been offering a B.Tech. course in Computer Science Engineering since 2005. The department is dedicated to achieving excellence among Indian colleges in its field, which is reflected in its state-of-the-art facilities and the commitment of its faculty members. The success of graduates in securing prominent positions in leading organizations highlights the quality of education provided.

Beyond technical education, the department aims to nurture leadership qualities in students, encouraging them to become job creators and entrepreneurs. This holistic approach not only supports individual growth but also drives economic development and innovation.

Maintaining a positive and innovative learning environment, staying current with industry trends, and providing value-added courses are essential components in preparing students for the ever-evolving field of Computer Science and Engineering. By continuing this dedication to excellence, the department will uphold its reputation and produce distinguished graduates in the future.

GOOGLE DEVELOPER GROUP

BUILD WITH AI

The primary objective of this event is to bring together developers, AI enthusiasts, and tech professionals to explore the latest advancements in artificial intelligence. Participants will gain hands-on experience with Google's AI tools, learn from industry experts, and collaborate on innovative AI-driven projects.

Explore, Learn and Build AI innovation together.

GUEST LECTURE

IDEA-VALIDATION

To provide a structured platform for innovators and entrepreneurs to present their ideas, receive constructive feedback from industry experts, mentors, and peers, and validate the feasibility, market potential, and scalability of their concepts.

Guest Speaker: Mr. Ravi Rautela (Director –Innovation Msgos Orange Group of Companies).

Key Goals:

- Encourage participants to critically analyze and refine their ideas.
- Facilitate expert feedback to identify strengths, weaknesses, opportunities, and risks.
- Help participants develop a clear roadmap for further development and market readiness.

Mr. Ravi Rautela delivering the session

GUEST LECTURE

INNOVATION COMPETITION/CHALLENGES

The objective of the Innovation Competition/Challenges Event is to foster creativity, collaboration, and problem-solving by encouraging participants to develop innovative solutions to real-world challenges. The event aims to identify and nurture talent, providing a platform for individuals and teams to showcase their ideas and leverage diverse perspectives to address complex issues. By promoting industry and academic partnerships, the event seeks to drive technological and business advancements while offering participants access to mentorship, resources, and potential funding to turn their ideas into viable solutions. Ultimately, the event aspires to inspire a culture of continuous innovation, empowering participants to make a meaningful impact on society and the economy.

Delivering ground breaking ideas through and impacted innovation completion

MILAN 2025

To reunite IIMT alumni, fostering a sense of belonging and reconnecting them with their alma mater. To celebrate the achievements and journeys of former students while strengthening professional and personal bonds.

To create a platform for networking, mentorship, and collaboration among alumni and current students.

Dr. Navin Prakash and Dr. Ajay with alumni

GUEST LECTURE

EMERGING TECH (AI-ML) & MARKET TRENDS

The objective of the guest lecture on Emerging Technologies (AI-ML) & Market Trends is to provide a comprehensive understanding of the latest advancements in artificial intelligence and machine learning, their real-world applications, and their impact across industries. The session aims to educate attendees on key AI-ML concepts, cutting-edge innovations such as generative AI, deep learning, and natural language processing, as well as the evolving market landscape shaping the adoption of these technologies.
