From Chief Editor's Desk

Prof. (Dr.) Mahendra Sharma

HOD, Department of Information Technology

The Department of Information Technology is a new-age academic habitat which aims to set a benchmark in technical education through a multi-disciplinary program that will work at the intersection of coding, business strategies, data analytics, design thinking, and global networks in the era of new IT technology and services.

It's a great pleasure and responsibility to lead the Department of Information Technology at IIMT College of Engineering. The department offers B.Tech degree program in Information Technology.

The department focuses mainly on innovative research and emerging solutions .The outstanding faculty and their instructional deliverymakes them push the students for academic growth and excellence. Our faculty members have an implausible sense of teamwork in order to produce the most extraordinary technocrats for the industry and prepare students to face global issues. The department has recognized the importance of integrating significant research activities with academics in order to improve the scholastic standards in teaching and the output quality.

The department's current upgradation is to strengthen the laboratory infrastructure by bringing in new industry-relevant technologies to enable students to learn at a higher pace, stimulate and integrate learning by providing multiple industry-relevant interfaces, and enable students to take up industry-relevant projects.

Entrepreneurial–minded students should use this guided opportunity to become successful entrepreneurs.

Let me conclude my thoughts with a saying “Education is a continual process, it's like a bicycle… If you don't pedal you don't go forward”.

Wishing all the very best to the team and students of our department.

Prof. (Dr.) Mahendra Sharma | Chief Editor & HOD Dept. of IT

Education

is the most powerful weapon
which you can use to

Change the World
