Managing Director's Message

Dear Readers,

Warm greetings to everyone!

It is with great pride and joy that I congratulate Prof. (Dr.) Nakul Gupta and the esteemed faculty for their visionary leadership in bringing forth the Pharmacy Newsletter, Bheshaja. This initiative stands as a testament to IIMT College of Pharmacy's unwavering commitment to fostering knowledge, research, and innovation in the dynamic field of pharmacy.

Our Research & Development department continues to set benchmarks by collaborating with prestigious national and international institutions. These partnerships drive advancements in pharmaceutical research, drug discovery, and healthcare innovations, all while enriching the academic journey of our students.

Dr. Mayank Aggarwal

Managing Director
IIMT Group of Colleges,
Greater Noida, U.P.

Equally commendable is the role of our Training & Placement Cell, which ensures students gain valuable industry exposure through internships, specialized training, and robust placement opportunities. This equips them for successful careers in pharmaceutical companies, hospitals, and research institutions, reflecting our dedication to holistic professional development.

At IIMT College of Pharmacy, we strive to create a vibrant environment that nurtures excellence in education, groundbreaking research, and career advancement. The Bheshaja newsletter embodies our shared vision to remain at the forefront of this ever-evolving field.

I am confident that this edition will inspire and inform, sparking ideas and igniting curiosity. My heartfelt thanks go out to all contributors for their hard work and dedication. I eagerly look forward to your valuable feedback, which will help us shape even better editions in the future.

Best Regards,

Dr. Mayank Aggarwal

Amivantamab plus lazertinib shows survival benefit in lung cancer

by John Pinching | 27th Mar 2025

Janssen-Cilag International NV has released results from the Phase 3 MARIPOSA trial, showing a notable overall survival benefit for patients with EGFR-mutated advanced non-small cell lung cancer (NSCLC). The study evaluated Rybrevant (amivantamab) in combination with Lazcluze (lazertinib) versus osimertinib as a first-line treatment.

Presented at the 2025 European Lung Cancer Congress, the findings revealed that the amivantamab-lazertinib duo significantly extended overall survival compared to osimertinib alone.

While the median overall survival for the combination treatment has yet to be reached, projections indicate it could exceed osimertinib's median of 36.7 months by over a year.

Janssen-Cilag International NV has released results from the Phase 3 MARIPOSA trial, showing a notable overall survival benefit for patients with EGFR-mutated advanced non-small cell lung cancer (NSCLC). The study evaluated Rybrevant (amivantamab) in combination with Lazcluze (lazertinib) versus osimertinib as a first-line treatment.

Presented at the 2025 European Lung Cancer Congress, the findings revealed that the amivantamab-lazertinib duo significantly extended overall survival compared to osimertinib alone.

While the median overall survival for the combination treatment has yet to be reached, projections indicate it could exceed osimertinib's median of 36.7 months by over a year.

Professor Nicolas Girard, a lead investigator, noted that the survival curve for the combination therapy continues to diverge from that of osimertinib, suggesting growing long-term benefits. "This widening gap is exactly what we aim for in lung cancer treatment," he said, highlighting a potential shift in the treatment landscape for EGFR-mutated advanced NSCLC.

The combination therapy also improved several secondary endpoints, including intracranial progression-free survival and time to symptom progression. The safety profile was in line with earlier findings, and adverse events were manageable.

Dr. Henar Hevia, Senior Director and EMEA Oncology Lead at Johnson & Johnson Innovative Medicine, emphasized the broader impact: "We are proud to be redefining care standards in lung cancer. These results highlight the transformative potential of this chemotherapy-free combination in the first-line setting for patients and their families."

The MARIPOSA study had already achieved its primary endpoint in October 2023 by showing a statistically significant improvement in progression-free survival over osimertinib.

ALUMNI TESTIMONIALS

Aakanksha Deol
B.Pharm (Batch 2012)

Some places leave a mark on your soul, and for me, that place is you. More than just an institution, you have been my second home—a place where I discovered my strengths, overcame my fears, and shaped my dreams.

Within your walls, I found more than just education; I found inspiration, friendships, and a lifetime of memories. The laughter in the hallways, the endless discussions in classrooms, the quiet moments in the library, and the warmth of teachers who believed in me even when I doubted myself—these are the moments I will carry with me forever.

As I look back on my journey, I realize that my time at this institution was more than just an academic pursuit—it was a transformative experience that shaped my career, character, and aspirations.

From the classrooms that sparked curiosity to the friendships that turned into lifelong bonds, every moment spent here has been invaluable. The guidance of our dedicated professors, the support of mentors, and the vibrant campus life have all played a crucial role in making us who we are today.

Thank you, IIMT, for being more than just an institution—for being a home of learning, growth, and countless cherished memories. No matter where life takes me, I will always be proud to call myself an alumnus of this incredible place.
