Success has achieved new dimensions in current times. Earlier success was defined by fame and money but as we become more aware of limitations of human life we have started to value health, happiness and mental peace as new dimensions of success. That is the reason why ethical value building among the students has become a priority in the educational institutions. As educators we try to fulfil this responsibility by teaching students the importance of giving back to the society in whatever form we can give. Being a good human being is as important as being successful.
