“How to Write the Quality Question Paper Based on Bloom’s Taxonomy”

IQAC was organized an Expert Lecture on **“How to Write the Quality Question Paper Based on Bloom’s Taxonomy” on 25th January, 2024.**

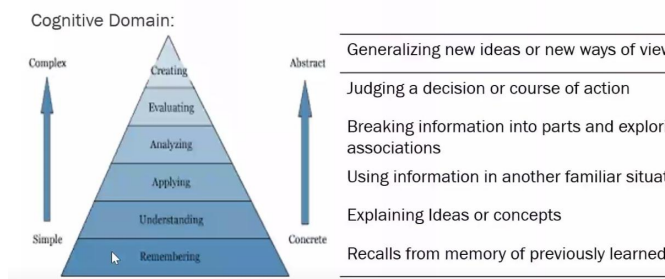

The quality of an education system to a greater extent depends on the standard of its assessment practices. When the standards of assessments are poised at a higher level of learning, then obviously the curriculum and the learning experience should keep in pace with the level of evaluation standards. Hence it is truly said that assessment is an engine that drives the students’ learning.

One of the common recommendations by several committees on examination reform do insist that the Higher order thinking skills of the scholars need to be tested especially at higher education level. In this context it seems more relevant to conduct a study on to what extent the Indian University and Higher Education systems endorse this policy.

Bloom's Taxonomy (1956) question samples:

1. Knowledge: How many...? ...
2. Comprehension: Can you write in your own words...? ...
3. Application: Choose the best statements that apply... ..
4. Analysis: Which events could have happened...? ...
5. Synthesis: Can you design a ... to achieve ...? ...
6. Evaluation: What criteria would you use to assess...?

BLOOMS TAXONOMY - REVISED
